Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at http://about.jstor.org/participate-jstor/individuals/early-journal-content.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

OFFICERS OF THE SOCIETY

Mr. H. D. CURTIS .....*President*
Mr. A. G. MCADIE .....*First Vice-President*
Mr. G. E. HALE .....*Second Vice-President*
Mr. R. T. CRAWFORD .....*Third Vice-President*
Mr. D. S. RICHARDSON .....*Secretary and Treasurer*
Mr. R. G. AITKEN .....*Secretary on Mt. Hamilton*

Board of Directors—Messrs. R. G. AITKEN, W. W. CAMPBELL, W. H. CROCKER, C. S. CUSHING, H. D. CURTIS, G. E. HALE, R. T. CRAWFORD, A. G. MCADIE, J. COSTA, D. S. RICHARDSON, S. D. TOWNLEY.

Finance Committee—Messrs. C. S. CUSHING, W. H. CROCKER, C. BURCKHALTER.

Committee on Publication—Messrs. R. G. AITKEN, H. D. CURTIS.

Library Committee—Messrs. J. COSTA, A. H. MARKWART, D. S. RICHARDSON.

Comet-Medal Committee—Messrs. W. W. CAMPBELL, S. D. TOWNLEY, H. D. CURTIS.

NOTICE

Article VIII of the By-Laws of the Society, as amended in 1903, reads as follows: "Each active member shall pay, as annual dues, the sum of five dollars, due on the first day of January each year in advance. When a new member is elected during the first quarter of any year, he shall pay full dues for such year; when elected during the second quarter, he shall pay three fourths only of such dues; when elected during the third quarter, he shall pay one half only of such dues; when elected during the last quarter, he shall pay one fourth only of such dues; provided, however, that one half only of the dues in this article provided for shall be collected from any member who is actually enrolled as a student at a university, seminary, high school, or other similar institution of learning, during such time as he is so enrolled. . . . Any member may be released from annual dues by the payment of fifty dollars at any one time, and placed on the roll of life members by the vote of the Board of Directors. . . ."

Volumes for past years will be supplied to members, so far as the stock on hand is sufficient, on the payment of two dollars per volume to either of the Secretaries. Single copies will be supplied on the following basis: one dollar to non-members, seventy-five cents to dealers, and fifty cents to members.

Members within the United States may obtain books from the library of the Society by sending to the Secretary ten cents postage for each book desired.

The order in which papers are printed in the *Publications* is decided simply by convenience. In general, those papers are printed first which are earliest accepted for publication. Papers intended to be printed in a given number of the *Publications* should be in the hands of the Committee not later than the 20th of the month preceding the month of publication. The responsibility for the views expressed in the papers printed, and for the form of their expression, rests with the writers, and is not assumed by the Society. Articles for the *Publications* should be sent to the chairman of the Committee on Publications, H. D. CURTIS, Lick Observatory, Mt. Hamilton, California.

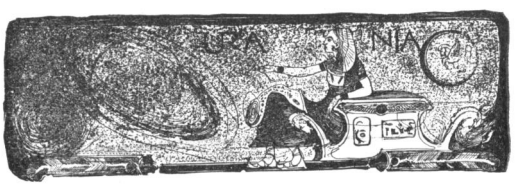
Reprints of the longer articles appearing in the *Publications* will be furnished free of cost, without covers, to the number of fifty copies, provided the request for such reprints is made at the time the manuscript is submitted. Binding in paper covers, or copies in excess of fifty, will be furnished at cost price.

Regular meetings of the Society are held in San Francisco or vicinity on the last Saturdays of January, March, June, and November, and at the Lick Observatory on the last Saturday of August. Members who propose to attend a meeting at Mount Hamilton should communicate with the Secretary-Treasurer, in order that arrangements may be made for transportation.

PUBLICATIONS ISSUED BI-MONTHLY.

(*February, April, June, August, October, December.*)

Published by the Astronomical Society of the Pacific at 748 Phelan Building, San Francisco, California. Subscription price, $5.00 per year.



INDEX TO VOLUME XXIV.

Abstracts from Astronomical Publications:

Application of the Selenium Cell to Photometry—A. H. PFUND, by W. H. WRIGHT 282
Community of Motion Among Several Stars of Large Proper Motion, by W. W. CAMPBELL 81
Diameters of the Stars, by H. D. CURTIS 284
Diurnal Range of Temperature and Other Meteorological Elements at Different Levels Above Mt. Weather, Va., by W. H. WRIGHT 281
"Holbrook Peas," The, by G. F. PADDOCK 285
Hypothetical Parallaxes of the Brighter Stars of Class A, by W. W. CAMPBELL 135
Nickelled Glass Reflectors for Celestial Photography, by H. D. CURTIS 140
Novel Direct Vision Spectroscope, A, by H. D. CURTIS 140
On the Distribution of Brightness in the Tail of Halley's Comet, by H. D. CURTIS 138
On the Masses of Spectroscopic Double Stars, by W. W. CAMPBELL 79
Orbit of *β Scorpionis,* by H. D. CURTIS 283
Photographic Magnitudes of the Sun and the Planets, by C. C. KIESS 279
Position of the Moon Determined Photographically, by R. G. AITKEN 82
Recent Progress in Spectroscopic Methods, by A. A. NICHELSON 84
Relativity Model, A, by H. D. CURTIS 140
Resonance Spectra of Iodine by Multiplex Excitation—R. W. WOOD, by W. H. WRIGHT 280
Secular Variations of the Elements of the Orbits of the Four Inner Planets for the Epoch 1850-0 G. M. T., by R. G. AITKEN 276
Spectroscopic Studies of Hydrogen by HARVEY BRUCE LEMON, by W. H. WRIGHT 173
Spectrum of Comet Morehouse, by W. H. WRIGHT 173
Stars Having Peculiar Spectra, by R. G. AITKEN 171
Statistical Investigation of Cometary Orbits, by R. G. AITKEN. 169
Tables for the True Anomaly in Elliptic Orbits, by R. G. AITKEN 278
Temperature Effect in Graduated Circles, by H. D. CURTIS..... 231
Three New Spectrographic Orbits, by G. F. PADDOCK 287
Variation of *α Ursæ Minoris,* by R. G. AITKEN 230
